Cumulative total return (in relation to NAV) for the fiscal year through 6-30-2022 -13.39%

Cumulative fiscal year distributions as a percentage of NAV as of 6-30-2022 8.61%

The above funds have adopted a managed distribution plan. Under a managed distribution plan, to the extent that sufficient investment income is not available monthly, the fund will distribute long-term capital gains and/or return of capital to maintain its managed distribution level. Investors should not draw any conclusions about the fund's investment performance from the amount of the fund's distributions or from the terms of the fund's managed distribution plan.

The Board of the fund may amend the terms of the plan or terminate the plan at any time without prior notice to the fund's shareholders. The amendment or termination of a plan could have an adverse effect on the market price of the fund's common shares. The plan will be subject to periodic review by the Board. With each distribution that does not consist solely of net investment income, the fund will issue a notice to shareholders and an accompanying press release which will provide detailed information regarding the amount and estimated composition of the distribution and other related information.

- more -

The amounts and sources of distributions reported above are only estimates and are not being provided for tax reporting purposes. The actual amounts and sources of the amounts for tax reporting purposes will depend upon the fund's investment experience during its full fiscal year and may be subject to changes based on tax regulations. The fund will send shareholders a Form 1099-DIV for the calendar year that will tell them how to report these distributions for federal income tax purposes. The fund may at times distribute more than its net investment income and net realized capital gains; therefore, a portion of the distribution may result in a return of capital. A return of capital may occur, for example, when some or all the money that shareholders invested in the fund is paid back to them. A return of capital does not necessarily reflect a fund's investment performance and should not be confused with 'yield' or 'income'. Any such returns of capital will decrease the fund's total assets and, therefore, could have the effect of increasing the fund's expense ratio. In addition, to make the level of distributions called for under its plan, the fund may have to sell portfolio securities at a less than opportune time.

About MFS Investment Management

In 1924, MFS launched the first US open-end mutual fund, opening the door to the markets for millions of everyday investors. Today, as a full-service global investment manager serving financial advisors, intermediaries and institutional clients, MFS still serves a single purpose: to create long-term value for clients by allocating capital responsibly. That takes our powerful investment approach combining collective expertise, thoughtful risk management and long-term discipline. Supported by our culture of shared values and collaboration, our teams of diverse thinkers actively debate ideas and assess material risks to uncover what we believe are the best investment opportunities in the market. As of June 30, 2022, MFS manages US\$552.9 billion in assets on behalf of individual and institutional investors worldwide. Please visit mfs.com for more information.

###

The Funds are closed-end Funds. Common shares of the Funds are only available for purchase/sale on the NYSE at the current market price. Shares may trade at a discount to NAV.
